I am a third-year IT student seeking a software engineering internship. I am a fast learner, highly observant, and consistently hardworking and dedicated. One of my weaknesses is that I can be overly detail-oriented in certain situations. My interests include gaming, exploring new technologies, reading, and listening to classical music.

EDUCATION

Bachelor's degree - Information Technology

Aug 2023 - Present

University of Transport Ho Chi Minh City

GPA: 7.5 / 10

Relevant Coursework: DSA, OOP, Programming Techniques, Discrete Mathematics, Software Engineering

Intermediate Degree - IT (Software Application)

Aug 2020 - Jul 2022

Ho Chi Minh Vocational College

GPA: 8.7 / 10

Top Graduate and Class President.

PROJECTS

Photo Palette [↗](#)

Feb 2026 - Present

Tech stacks: ReactTS, React Router, TailwindCSS, Vite, HTML5 Canvas (Client-side Rendering)

Description: An online photobooth web application based on the Photo Palette brand

Main tasks:

- Integrating the MediaStream API to manage webcams and provide real-time previews (Mirror/Filters).
- Building a countdown logic and automatic capture system via Custom Hooks.
- Using HTML5 Canvas to combine images into layouts (1x4, 2x2).
- Applying the MediaRecorder API to record (Recap) the image capture process from the Canvas stream.
- UI/UX: Designing a modern, smooth, and optimized interface across all devices (Responsive Design).

Live Demo: <https://photo-palette.vercel.app/>

NeoShop E-commerce [↗](#)

Jan 2026 - Mar 2026

Tech stacks: ReactJS, Java Spring Boot, PostgreSQL, WebSocket (STOMP), Docker Compose

Description: A full-stack e-commerce system for digital products with automated delivery.

Main tasks:

- Develop a full-stack system using ReactJS and Spring Boot (RESTful).
- Implement multi-layered security with JWT, Google OAuth2, and role-based access control (RBAC).
- Implement automated product code and action sending using Context API and LocalStorage.
- Integrated payment features include VNPay and MoMo sandbox gateways.
- Manage development using Docker Compose and automate API documentation with Swagger.

Live Demo: <https://neoshop-ecommerce.vercel.app/>

Game Caro [↗](#)

Dec 2025 - Feb 2026

Tech stacks: C# .NET Windows Forms, Socket (TCP), SunnyUI, AI Heuristic.

Description: Game CARO with LAN multiplayer and AI single-player modes.

Main tasks:

- Built a real-time multiplayer Gomoku game using C# .NET and TCP sockets, achieving <50ms latency in LAN environments.
- Designed a Client-Server architecture ensuring 100% synchronization accuracy between players.
- Developed an AI opponent using heuristic algorithms, achieving competitive win rates against human players.
- Improved user experience with a modern UI (SunnyUI), increasing usability and responsiveness.
- Implemented core game logic with efficient win detection and Undo/Redo, reducing gameplay errors and improving control.

CERTIFICATIONS

Gemini Certified Educator (Credential ID: 169275702) [↗](#) by Google for Education

Dec 2025

SKILLS

Programming: C#, Java, SQL, JavaScript, TypeScript

Databases: PostgreSQL, MySQL, SQL Server, MongoDB

System Design: RESTful APIs, Basic Microservices, System Modeling (UML)

Tools: VS Code, Postman, Figma, AI MCP (Claude, Antigravity, Stitch)

Soft Skills: Problem-Solving, Teamwork, Analytical Thinking, Critical Thinking

LANGUAGES

Vietnamese (Native proficiency) • English (Elementary proficiency)
