- Objective Short-term: To gain hands-on experience in software development and strengthen my fundamental knowledge through real-world projects. As a motivated intern, I want to learn from experienced developers, improve my problem-solving skills, and gradually grow into a professional **Software Engineer** who can contribute meaningful value to a team.
- Objective Long-term: Currently, I am learning how to use game engines such as Unity, Unreal, and Godot. This is so I can eventually transition to game design and development. Additionally, I am studying English to prepare for the TOEIC or IELTS certification exams.

EDUCATION

Bachelor's degree - Information Technology

Aug 2023 - Present

University of Transport Ho Chi Minh City

GPA: 3.2/4.0

Relevant Coursework:

- Artificial Intelligence and Applications (9.4/10)
- Introduction to IT (9.1/10)
- Software Engineering (9.0/10)

Intermediate Degree - IT (Software Application)

Aug 2020 - Jul 2022

Ho Chi Minh Vocational College

GPA: 8.7/10

Top Graduate and Class President.

PROJECTS

Photo Palette

Feb 2026 - Present

Role: Frontend Developer

Team Size: 1

- Built a Korean-style photobooth web app allowing users to capture, customize, and download photos in-browser
- Implemented real-time camera capture and image processing using **HTML5 Canvas & MediaStream APIs**
- Designed modular architecture with React components, custom hooks, and state management
- Developed interactive UI with smooth UX using **React, Vite, TypeScript, Tailwind CSS**
- Features include layout selection, countdown capture, frame customization, and instant download

NeoShop E-commerce

Jan 2026 - Mar 2026

Role: Fullstack Developer

Team Size: 1

- Developed full-stack e-commerce system for digital products using **ReactJS + Spring Boot**
- Implemented JWT authentication, Google OAuth2, and role-based access control
- Built real-time chat with **WebSocket (STOMP, SockJS)** and secure payment integration (VNPay, MoMo)
- Designed product key auto-delivery system and dynamic cart with Context API + LocalStorage
- Deployed with **Docker Compose**, integrated CI/CD and REST API documentation (Swagger)

Game Caro (Desktop)

Dec 2025 - Feb 2026

Role: Windows Forms Developer

Team Size: 2

- Developed a real-time Caro game using **C# .NET Windows Forms & Socket (TCP)**
- Implemented client-server architecture for LAN gameplay with synchronized moves and chat
- Designed game logic with board management, win detection, and undo/redo features
- Built interactive UI with **SunnyUI**, supporting avatar, timer, and player customization

SKILLS

Languages: C#, TypeScript, Java, Python, HTML5, CSS3, JavaScript

Frameworks/Libraries: React, Bootstrap, Spring Boot, .NET/Windows Forms

Databases & DevOps: PostgreSQL, MySQL, SQL Server, Docker, Git

Soft Skills: Leadership, Problem-Solving, Teamwork, Analytical Thinking
